

Some vegetables are quite progressive
Their growth gives me an awful fright
Like the mushroom that grows overnight

What bliss to be dancing with you
With beat of your heart next to mine
That's when the world is divine
I know we'll meet again
We'll meet in sunshine or in rain
I know we'll meet again
Though oceans may divide us
There is no land or sea that ever will deprive us
Of my love for thee

For there's nothing like dance
To start a romance
Most tender god [?] togetherness
To the theme of my happiness

We met
It was a glance
That started our senses [?]
It was the lilt [?] of your loveliness
Your smile so gay
So tantalising fay [?]
My sanity you're stealing
For you're so appealing
I cannot believe
